Community Reinvestment Act Notice

Under the Federal Community Reinvestment Act (CRA), the Federal Reserve Board (Board) evaluates our record of helping to meet the credit needs of this community consistent with safe and sound operations. The Board also takes this record into account when deciding on certain applications submitted by us.

Your involvement is encouraged.

You are entitled to certain information about our operations and our performance under the CRA, including, for example, information about our branches, such as their location and services provided at them; the public section of our most recent CRA Performance Evaluation, prepared by the Federal Reserve Bank of Kansas City; and comments received from the public relating to our performance in helping to meet community credit needs, as well as our responses to those comments. You may review this information today.

At least 30 days before the beginning of each quarter, the Federal Reserve System publishes a list of the banks that are scheduled for CRA examination by the Reserve Bank in that quarter. This list is available from the Assistant Vice President Consumer Affairs, Federal Reserve Bank of Kansas City, 1 Memorial Drive, Kansas City, MO 64198. You may send written comments about our performance in helping to meet community credit needs to Haley Elzinga, CRA Officer, High Country Bank, PO Box 309 Salida CO 81201 and to the Assistant Vice President Consumer Affairs, Federal Reserve Bank of Kansas City, 1 Memorial Drive, Kansas City MO 64198. Your letter, together with any response by us, will be considered by the Federal Reserve System in evaluating our CRA performance and may be made public.

You may ask to look at any comments received by the Reserve Bank. You may also request from the Reserve Bank an announcement of our applications covered by the CRA filed with the Reserve Bank. We are an affiliate of High Country Bancorp, Inc, a bank holding company. You may request from the Assistant Vice President Consumer Affairs, Federal Reserve Bank of Kansas City, 1 Memorial Drive, Kansas City MO 64198 an announcement of applications covered by the CRA filed by bank holding companies.

PUBLIC COMMENTS

All written comments from the public relating to High Country Bank's CRA performance and responses to them for the current and preceding two calendar years.

No complaints follow. There have been no public complaints submitted relating to High Country Bank's CRA performance.

INSTITUTION'S COMMUNITY REINVESTMENT ACT RATING

This institution is rated:

The Lending Test is rated:

The Community Development Test is rated:

Satisfactory.

Satisfactory.

High Country Bank (the bank) is rated **Satisfactory**. This rating is based on the following conclusions with respect to the performance criteria under the Lending and Community Development Tests:

- The bank's net loan-to-deposit ratio (NLTD) is reasonable given the bank's size, financial condition, and assessment areas (AAs) credit needs.
- A majority of the bank's loans are originated inside the AAs.
- A reasonable distribution of loans occurs throughout the bank's AAs.
- Lending reflects a reasonable distribution among individuals of different income levels, including low- and moderate-income (LMI), and businesses of different sizes.
- Neither the bank nor the Federal Reserve Bank of Kansas City (Reserve Bank) received any Community Reinvestment Act (CRA)-related complaints since the previous evaluation.
- Community development (CD) activity reflects adequate responsiveness to CD needs of its AAs.

SCOPE OF EXAMINATION

Examiners utilized the Federal Financial Institutions Examination Council's (FFIEC's) Interagency Examination Procedures for Intermediate Small Institutions to evaluate the bank's CRA performance. The evaluation considered CRA performance context, including the bank's asset size, financial condition, business strategy, and market competition, as well as the AA's demographic and economic characteristics, and credit needs. Additionally, for home mortgage lending, emphasis was placed on the bank's performance in comparison to aggregate lending data for the most recent three years (2019, 2020, and 2021), as aggregate lending is considered representative of credit demand. Aggregate data is not available for 2022 so demographic data was used for both home mortgage lending and small business lending for 2022. Performance was assessed within the bank's two AAs. The Central Colorado AA was assessed using a full scope review. The Boulder Metropolitan Statistical Area (MSA) AA was assessed using a limited scope review. More weight was given to home mortgage lending, given the higher loan volume. Examiners reviewed the following data:

- The bank's 18-quarter average NLTD ratio.
- The universe of 1,013 Home Mortgage Disclosure Act (HMDA) loans reported from January 1, 2021 to December 31, 2022.

- A statistical sample of 73 small business loans selected from a universe of 115 loans originated from January 1, 2022 through December 31, 2022.
- CD loans, qualified investments, and CD services from January 29, 2019 through June 30, 2023.

DESCRIPTION OF INSTITUTION

The bank is a community bank headquartered in Salida, Colorado. The bank's characteristics include:

- The bank is a wholly owned subsidiary of High Country Bancorp, Inc.
- The bank has total assets of \$440.1 million as of December 31, 2022.
- In addition to its main office in Salida, the bank has four additional branches located in Salida, Buena Vista, Canon City, and Longmont, Colorado.
- The bank operates five ATMs, with one at each branch location.
- As shown in the table below, the bank's primary business focus is commercial and residential real estate. Please note that secondary market loans are not captured in the table below.

Table 1

| Composition of Loan Portfolio as of December 31, 2022 | | | | | | |
|--|---------|-------|--|--|--|--|
| Loan Type | \$(000) | % | | | | |
| Construction and Land Development | 70,419 | 21.8 | | | | |
| Farmland | 903 | 0.3 | | | | |
| 1-4 Family Residential Real Estate | 122,703 | 38.0 | | | | |
| Multifamily Residential Real Estate | 0 | 0.0 | | | | |
| Non-Farm Non-Residential Real Estate | 106,165 | 32.9 | | | | |
| Agricultural | 0 | 0.0 | | | | |
| Commercial and Industrial | 20,234 | 6.3 | | | | |
| Consumer | 2,472 | 0.8 | | | | |
| Other | 41 | 0.0 | | | | |
| Gross Loans | 322,937 | 100.0 | | | | |
| Note: Percentages may not total 100.0 percent due to rounding. | | | | | | |

The bank was rated Satisfactory under the CRA at its January 28, 2019 performance evaluation. There are no known legal, financial, or other factors impeding the bank's ability to help meet the credit needs in its communities.

CONCLUSIONS WITH RESPECT TO PERFORMANCE CRITERIA¹

LENDING TEST

This performance evaluation first discusses the bank's overall performance, followed by an in-depth evaluation of performance in the Central Colorado AA which received a full scope review, and a brief discussion of performance in the Boulder MSA AA which received a limited scope review.

The bank's overall lending test performance is satisfactory based on a reasonable NLTD ratio, a majority of loans originated within the bank's AAs, an overall reasonable geographic distribution and a reasonable borrower distribution of loans. The bank's performance in the Boulder MSA AA is consistent with performance in the Central Colorado AA.

Net Loan-to-Deposit Ratio

This performance criterion evaluates the bank's average NLTD ratio to determine the reasonableness of lending in light of performance context, such as the bank's capacity to lend, the availability of lending opportunities, the demographic and economic factors present in the AAs, and in comparison, to similarly situated FDIC-insured institutions. The similarly situated institutions were selected based on asset size, product offering, market share and geographic similarity to the bank's branch locations.

The bank's NLTD ratio is reasonable. The bank's NLTD ratio averaged 81.7 percent over the most recent 18-quarters ending December 31, 2022, and was between the ratios of five similarly situated financial institutions, with ratios ranging from 51.0 percent to 86.3 percent.

_

The net loan-to-deposit ratio and percentage of loans and other lending-related activity in the assessment area only apply to the institution overall. No discussion of these performance criteria applies to sections of the performance evaluation related to assessment areas.

Table 2

Assessment Area Concentration

This performance criterion evaluates the percentage of lending extended inside and outside of the AAs. The bank originated a majority of loans, by number and dollar, inside the AAs.

Geographic Distribution of Loans

This performance criterion evaluates the bank's distribution of lending within its AAs by income level of census tracts, with consideration given to the dispersion of loans throughout the AAs. The bank's overall geographic distribution of loans reflects reasonable distribution among the different census tracts and dispersion throughout the AAs. Performance context was considered for products or years where loans originated to the moderate-income census tracts were below demographic or aggregate data.

Lending to Borrowers of Different Income Levels and to Businesses of Different Sizes

This performance criterion evaluates the bank's lending to borrowers of different income levels and businesses of different revenue sizes. The bank's lending has an overall reasonable distribution among individuals of different income levels and businesses of different sizes.

COMMUNITY DEVELOPMENT TEST

The CD test evaluates the bank's responsiveness to CD needs of its AAs through CD loans, qualified investments, and CD services, considering the bank's capacity and the need and availability of such opportunities in the bank's AAs.

The bank's overall CD test performance is Satisfactory and demonstrates adequate responsiveness. Of the bank's overall CD lending activity, 464 were Small Business Administration Paycheck Protection Program (PPP) loans, totaling \$18.7MM, helping to revitalize or stabilize LMI geographies and distressed/underserved middle-income tracts or to support small businesses and LMI jobs.

Additionally, consideration was given to the following CD activities that took place outside of the bank's AAs, but within the broader regional area:

- The bank originated 19 loans through the PPP, totaling \$674,716, helping to revitalize or stabilize LMI geographies and to support small businesses and LMI jobs.
- The bank also originated 20 residential real estate loans to low- to moderateincome families.

FAIR LENDING OR OTHER ILLEGAL CREDIT PRACTICES REVIEW

Compliance with the substantive provisions of antidiscrimination and other consumer protection laws and regulations, including the Equal Credit Opportunity Act and the Fair Housing Act, was considered as part of this CRA evaluation. No evidence of a pattern or practice of discrimination on a prohibited basis or of other illegal credit practices inconsistent with helping to meet community credit needs was identified.

CENTRAL COLORADO ASSESSMENT AREA NONMETROPOLITAN AREA

(Full-Scope Review)

DESCRIPTION OF THE INSTITUTION'S OPERATIONS IN CENTRAL COLORADO AA

The bank's Central Colorado AA consists of Chaffee and Fremont Counties in their entirety.

- The AA delineation remains unchanged since the prior CRA evaluation. Due to the release of 2020 Decennial Census data, the bank's AA is comprised of 21 census tracts, including 4 moderate-, 12 middle-, 2 upper-, and 3 unknownincome census tracts. The AA contains no low-income census tracts. Additionally, 5 of the 6 census tracts in Chaffee County are considered underserved.
- Prior to the Census data update, the bank's 2021 AA was comprised of 19 census tracts, including 6 moderate-, 10 middle-, and 3 unknown-income census tracts.
- According to the June 30, 2022, FDIC Market Share Report, the bank ranked 2nd of 12 FDIC-insured depository institutions operating from 21 locations in the AA, with a total deposit market share of 23.0 percent.
- The bank operates three branches in Chaffee County and one branch in Fremont County. The bank has a larger presence in Chaffee County, where the majority of loans are originated. According to the FDIC Market Share report for Chaffee County, the bank's deposit market share is 42.1 percent, which ranked 1st out of 7 FDIC-insured institutions. However, in Fremont County, the bank is ranked 6th out of 9 banks with a deposit market share of 5.7 percent.
- An interview with a community member was conducted as part of the CRA evaluation for this AA to ascertain the credit needs of area communities, the responsiveness of area banks in meeting those credit needs, and for perspectives on local economic conditions. The community member represented a real estate agency serving the Central Colorado AA.

| 2011-2015 U.S. Census Bureau: Am | erican Community Survey | | | | | | | |

- Based on 2020 Census data, the two-county AA contained 1.2 percent of the Colorado population and was below the population growth of the State of Colorado but exceeded the growth rate of other non-metropolitan areas of Colorado.
- Fremont County comprises the majority of the AA's population at 71.5 percent and contains one of the bank's five branches.

Table 6

| lable 0 | | | | | | | | |
|---|------------------------------------|--------------------|----------------|--|--|--|--|--|
| Median Family Income Change | | | | | | | | |
| Assessment Area: Central Colorado | | | | | | | | |
| | 2015 Median | 2020 Median | | | | | | |
| Area | Family Income | Family Income | Percent Change | | | | | |
| Central Colorado | 57,628 | 66,730 | 15.8 | | | | | |
| Chaffee County, Colorado | 68,107 70,603 | | 3.7 | | | | | |
| Fremont County, Colorado | 53,506 | 67,029 | 25.3 | | | | | |

| Note: Median family incomes have been in | tlation-adjusted and are expressed | d in 2020 dollars. | | | | | | |

- Income growth in Chaffee County was below other non-metropolitan areas of Colorado and was well below Fremont County, which experienced significant growth that was well above income growth in other non-metropolitan areas and the State of Colorado.
- The portion of AA families living below the poverty level in 2020, at 8.9 percent is comparable to the other non-metropolitan areas at 8.0 percent but above the State of Colorado figure of 6.1 percent.

| Cost Burden is housing cost that | equals 30 percent | or more of househo | ld income. | | | | | | |

 A community member stated that housing availability is limited and has driven prices very high, causing shortages in affordable housing. Additionally, the AA

Source: U.S. Department of Housing and Urban Development (HUD), 2015-2019 Comprehensive Housing Affordability Strategy

has experienced an influx of people moving to the area as well as second home purchasers, which has resulted in a lack of housing availability.

- Unemployment rates in 2021 have decreased from the levels in 2020 but remain higher than rates noted prior to the onset of the COVID-19 pandemic.
- Tourism is the primary economic driver for the AA, particularly in Chaffee County, which results in strong employment in the leisure and hospitality industry. Other major employers in the AA include several state and federal correctional facilities, health care and social assistance facilities, mining, retail, and education.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN COLORADO CENTRAL AA

LENDING TEST

The bank's performance in the Colorado Central AA is reasonable, with more weight placed on home mortgage lending based on higher loan volume, as previously noted. The bank's geographic distribution of loans is considered reasonable. The distribution of lending amongst borrowers of different income levels and businesses of different sizes is also considered reasonable.

Geographic Distribution of Loans

The bank's geographic distribution of loans reflects reasonable distribution among the different census tracts and dispersion throughout the AA. As previously noted, the AA contains no low-income census tracts. Therefore, emphasis was placed on lending in the AA's moderate-income census tracts in assessing the bank's performance. For home mortgage lending, home improvement loans were not evaluated at the product level due to insufficient volume to conduct a meaningful analysis. The geographic distribution of home mortgage lending is reasonable; however, the distribution of small business loans is considered poor.

Home Mortgage Lending

The geographic distribution of home mortgage lending is reasonable. The bank's 2022 lending in the AA's moderate-income census tracts was below aggregate lending data but was comparable to the demographic figure.

The bank's 2021 lending was below both aggregate lending data and the demographic figure. Additional performance context was considered in assessing the bank's 2021 performance. After considering this context, the bank's 2021 performance did not impact the overall rating for home mortgage lending.

Several performance context factors contributed to the difference in home mortgage lending performance between 2021 and 2022. First, the bank has a larger presence in Chaffee County, which presents less opportunity to lend in moderate-income census tracts as it contains only one of the AA's six moderate-income census tracts in 2021. The bank operates three branches and ranks 1st of 7 banks in deposit market share in this county as of June 30, 2022. This is compared to Fremont County, where the bank operates only one branch and ranks 6th of 9 banks in deposit market share. Further, 84.0percent of all home mortgage loans in 2021 were originated in Chaffee County. A community contact in Fremont County described a competitive banking environment with competition being further affected by increased interest rates which have caused some decrease in loan demand.

Another factor contributing to the difference in the bank's performance between 2021 and 2022 were changes in the income level designations for many census tracts in the AA. The number of moderate-income census tracts went from four in 2021 to six in 2022, with several tracts that were previously middle-income changing to moderate-income and several moderate tracts changing to middle-income tracts. This resulted in a significant change in the demographic figure (percentage of owner-occupied units) that is used to compare to the bank's lending performance. In 2021 moderate-income census tracts contained 37.7 percent of owner-occupied units, which is significantly higher than the 2022 figure of 16.5 percent. Despite a higher level of lending by number and dollar to low-and moderate-income tracts in 2021, these changes in demographic figures made the bank's performance appear worse than the performance in 2022. These changes in demographic figures impacted the bank's performance between 2021 and 2022 for all home mortgage products and is considered in assessing the performance of each product below.

A review of the dispersion of total home mortgage lending did not reveal a conspicuous gap or lapse in lending.

Home Purchase Loans

The geographic distribution of home purchase lending is reasonable. The bank's home purchase lending in the AA's moderate-income census tracts was below aggregate lending data but was comparable to the demographic figure in 2022.

The bank's 2021 home purchase lending in moderate-income census tracts exceeded 2022 lending by number and dollar but was below the demographic figure.

A review of the dispersion for home purchase lending revealed no significant gaps or lapses in lending.

Home Refinance Loans

The geographic distribution of home refinance loans is reasonable. The bank's 2022 home refinance lending in the AA's moderate-income census tracts was below aggregate lending data but was comparable to demographic lending data by number and by dollar volume.

The bank's 2021 home refinance lending in moderate-income census tracts exceeded 2022 lending by number and dollar but was below the demographic figure.

A review of loan dispersion for home refinance lending revealed no conspicuous gaps and lapses in lending.

Note: Percentages may not total 100.0 percent due to rounding. *Aggregate data is not currently available.

Due to limited volume in the Other Purpose LOC, Other Purpose Closed/Exempt, and Purpose Not Applicable product categories, these categories are not displayed individually but are included in the total HMDA section of the table.

Small Business Lending

The geographic distribution of small business lending is poor. The bank's distribution of small business loans to moderate-income census tracts was below the percentage of businesses located in these tracts.

A review of loan dispersion for small business lending revealed conspicuous gaps and lapses, although the overall conclusion was not impacted.

Lending to Borrowers of Different Income Levels and to Businesses of Different Sizes

The bank's lending has a reasonable distribution among individuals of different income levels and businesses of different sizes. For home mortgage lending, home improvement loans were not evaluated at the product level due to insufficient volume to conduct a meaningful analysis. The distribution of home mortgage and small business lending was reasonable.

Home Mortgage Lending

The borrower distribution of home mortgage lending is reasonable. The bank's 2022 lending to low-income borrowers was comparable to aggregate lending data by number and dollar volume and below the demographic figure. Lending to moderate-income borrowers in 2022 was comparable to aggregate lending data by number and dollar volume and comparable to the demographic figure.

The bank's 2021 borrower distribution of home mortgage lending was consistent with 2022 performance.

Home Purchase Loans

The borrower distribution of home purchase lending is reasonable. The bank's lending to low-income borrowers in 2022 was above the aggregate lending data by number and by dollar volume, but below the demographic figure. Lending to moderate-income borrowers was above the aggregate lending data by number and dollar volume but was comparable to the demographic figure in 2022.

The bank's 2021 borrower distribution of home purchase lending was below 2022 performance with lending penetration to low- and moderate-income borrowers below aggregate lending data and the demographic figures.

Home Refinance Loans

The borrower distribution of home refinance lending is reasonable. The bank's lending to low-income borrowers in 2022 was comparable to aggregate lending data by number, below by dollar volume, and below the demographic figure. Lending to moderate-income borrowers in 2022 was comparable to aggregate lending data by number, below by dollar volume, and comparable to the demographic figure.

The bank's 2021 borrower distribution of home refinance lending exceeded 2022 performance with lending to low- and moderate-income borrowers that was comparable to aggregate data by number and dollar volume but was below the demographic figures.

Note: Percentages may not total 100.0 percent due to rounding. *Aggregate data is not currently available.

Multifamily loans are not included in the borrower distribution analysis.

Due to limited volume in the Other Purpose LOC, Other Purpose Closed/Exempt, and Purpose Not Applicable product categories, these categories are not displayed individually but are included in the total HMDA section of the table.

Small Business Lending

The borrower distribution of small business lending is reasonable. The bank's lending to businesses with revenues of \$1MM or less was comparable to the demographic figure. Additionally, approximately 85.4 percent of originated loans were under \$250,000, indicating the bank is able to meet the needs of small businesses who typically have limited repayment capacity and require smaller amounts of credit.

COMMUNITY DEVELOPMENT TEST

The bank's CD performance demonstrates adequate responsiveness. The CD test evaluates the bank's responsiveness to CD needs of its AAs through CD loans, qualified investments, and CD services, considering the bank's capacity and the need and availability of such opportunities in the bank's AAs.

The bank's CD test performance in the Central Colorado AA is satisfactory and demonstrates adequate responsiveness. Of the bank's overall CD lending activity, 463 were Small Business Administration Paycheck Protection Program (PPP) loans totaling \$18.7MM helping to revitalize or stabilize LMI geographies and distressed/underserved middle-income tracts or to support small businesses and LMI jobs.

Additionally, based on the bank meeting the CD needs of its AAs, consideration was given to the following CD activities that took place outside of the bank's AAs, but within the broader regional area that included:

- The bank originated 19 loans through the PPP totaling \$674,716 helping to revitalize or stabilize LMI geographies and to support small businesses and LMI jobs.
- The bank also originated 20 residential real estate loans to low-and moderate-income families.

BOULDER MSA ASSESSMENT AREA METROPOLITAN AREA

(Limited-Scope Review)

DESCRIPTION OF THE INSTITUTION'S OPERATIONS IN BOULDER MSA AA

The bank's delineated AA is comprised of Boulder County in its entirety, which makes up the Boulder MSA AA.

- This AA is new since the prior examination, as the bank opened a new branch in November of 2020. The 2022 AA is comprised of 78 tracts, including, 4 low-, 13 moderate-, 32 middle-, 26 upper-, and 3 unknown-income census tracts.
- The AA is home to 14,995 families, 20.5 percent of which are low-, 17.8 percent are moderate, 21.3 percent are middle-, and 40.5 percent are upper-income.
- According to the June 30, 2022 FDIC Summary of Deposits Market Share Report, the bank ranked 32nd of 32 FDIC-insured depository institutions operating from 95 locations in the AA, with a total deposit market share of .03 percent.
- While the bank maintains the same overall strategic focus, the Boulder market has presented challenges in maintaining consistent staffing and generating productive loan volume.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN BOULDER MSA AA

The institution's lending performance in the area is consistent with the institution's overall lending performance.

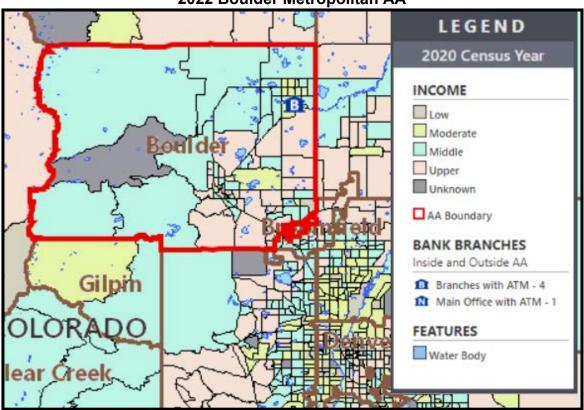

The institution's community development performance in the area is below the institution's community development performance for the institution; however, it does not change the rating for the institution.

Multifamily loans are not included in the borrower distribution analysis.

APPENDIX E - GLOSSARY

Aggregate lending: The number of loans originated and purchased by all reporting lenders in specified income categories as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the metropolitan area/assessment area.

Census tract: A small subdivision of metropolitan and other densely populated counties. Census tract boundaries do not cross county lines; however, they may cross the boundaries of metropolitan statistical areas. Census tracts usually have between 2,500 and 8,000 persons, and their physical size varies widely depending upon population density. Census tracts are designed to be homogeneous with respect to population characteristics, economic status, and living conditions to allow for statistical comparisons.

Community development: Affordable housing (including multifamily rental housing) for low- or moderate-income individuals; community services targeted to low- or moderate-income individuals; activities that promote economic development by financing businesses or farms that meet the size eligibility standards of the Small Business Administration's Development Company or Small Business Investment Company programs (13 CFR 121.301) or have gross annual revenues of \$1 million or less; or, activities that revitalize or stabilize low- or moderate-income geographies, designated disaster areas; or designated distressed or underserved nonmetropolitan middle-income geographies.

Consumer loan(s): A loan(s) to one or more individuals for household, family, or other personal expenditures. A consumer loan does not include a home mortgage, small business, or small farm loan. This definition includes the following categories: motor vehicle loans, credit card loans, other secured consumer loans, and other unsecured consumer loans.

Family: Includes a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. The number of family households always equals the number of families; however, a family household may also include nonrelatives living with the family. Families are classified by type as either a married-couple family or other family, which is further classified into 'male householder' (a family with a male householder and no wife present) or 'female householder' (a family with a female householder and no husband present).

Full-scope review: Performance is analyzed considering performance context, quantitative factors (for example, geographic distribution, borrower distribution, and total number and dollar amount of investments), and qualitative factors (for example, innovativeness, complexity, and responsiveness).

Geography: A census tract delineated by the United States Bureau of the Census in the most recent decennial census.

Home Mortgage Disclosure Act (HMDA): The statute that requires certain mortgage lenders that do business or have banking offices in a metropolitan statistical area to file annual summary reports of their mortgage lending activity. The reports include such data as the race, gender, and the income of applications, the amount of loan requested, and the disposition of the application (for example, approved, denied, and withdrawn).

Home mortgage loans: Includes home purchase and home improvement loans as defined in the HMDA regulation. This definition also includes multifamily (five or more families) dwelling loans, loans for the purchase of manufactured homes and refinancings of home improvement and home purchase loans.

Household: Includes all persons occupying a housing unit. Persons not living in households are classified as living in group quarters. In 100 percent tabulations, the count of households always equals the count of occupied housing units.

Limited-scope review: Performance is analyzed using only quantitative factors (for example, geographic distribution, borrower distribution, total number and dollar amount of investments, and branch distribution).

Low-income: Individual income that is less than 50 percent of the area median income, or a median family income that is less than 50 percent, in the case of a geography.

Market share: The number of loans originated and purchased by the institution as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the metropolitan area/assessment area.

Metropolitan area (MA): A metropolitan statistical area (MSA) or a metropolitan division (MD) as defined by the Office of Management and Budget. A MSA is a core area containing at least one urbanized area of 50,000 or more inhabitants, together with adjacent communities having a high degree of economic and social integration with that core. A MD is a division of a MSA based on specific criteria including commuting patterns. Only a MSA that has a population of at least 2.5 million may be divided into MDs.

Middle-income: Individual income that is at least 80 percent and less than 120 percent of the area median income, or a median family income that is at least 80 percent and less than 120 percent, in the case of a geography.

Moderate-income: Individual income that is at least 50 percent and less than 80 percent of the area median income, or a median family income that is at least 50 percent and less than 80 percent, in the case of a geography.

Multifamily: Refers to a residential structure that contains five or more units.

Nonmetropolitan area (NonMSA): Any area that is not located within an MSA. **Other products**: Includes any unreported optional category of loans for which the institution collects and maintains data for consideration during a CRA examination. Examples of such activity include consumer loans and other loan data an institution may provide concerning its lending performance.

Owner-occupied units: Includes units occupied by the owner or co-owner, even if the unit has not been fully paid for or is mortgaged.

Qualified investment: A qualified investment is defined as any lawful investment, deposit, membership share, or grant that has as its primary purpose community development.

Rated area: A rated area is a state or multistate metropolitan area. For an institution with domestic branches in only one state, the institution's CRA rating would be the state rating. If an institution maintains domestic branches in more than one state, the institution will receive a rating for each state in which those branches are located. If an institution maintains domestic branches in two or more states within a multistate metropolitan area, the institution will receive a rating for the multistate metropolitan area. For these institutions, no state ratings will be received unless the bank also maintains deposit facilities outside of the multistate metropolitan area. CRA activity is captured in either a state rating or a multistate metropolitan area rating, but not both.

Small loan(s) to business(es): A loan included in 'loans to small businesses' as defined in the Consolidated Report of Condition and Income (Call Report) instructions. These loans have original amounts of \$1 million or less and typically are either secured by nonfarm or nonresidential real estate or are classified as commercial and industrial loans. However, thrift institutions may also exercise the option to report loans secured by nonfarm residential real estate as 'small business loans' if the loans are reported on the TFR as nonmortgage, commercial loans.

Small loan(s) to farm(s): A loan included in 'loans to small farms' as defined in the Consolidated Reports of Condition and Income (Call Report) instructions. These loans have original amounts of \$500,000 or less and are either secured by farmland or are classified as loans to finance agricultural production and other loans to farmers.

Upper-income: Individual income that is more than 120 percent of the area median income, or a median family income that is more than 120 percent, in the case of a geography.

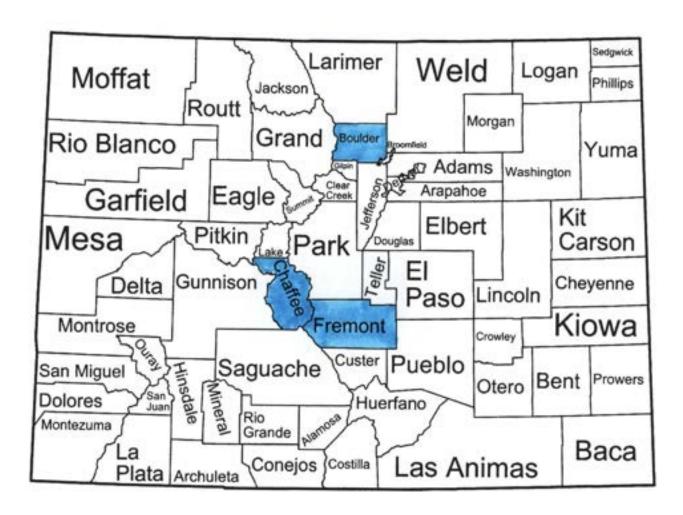

ASSESSMENT AREA

A map of each assessment area showing its boundaries and, on the map or in a separate list, the geographies contained within the assessment area.

Assessment Area

Chaffee County, Fremont County, and Boulder County

High Country Bank has designated its Assessment Area (AA) as all tracts located in Chaffee, Fremont, and Boulder Counties in Colorado. Chaffee and Fremont Counties are located in Central Colorado and are rural, sparsely populated, and generally mountainous. Both counties are inside the state of Colorado's Upper Arkansas River Enterprise Zone. Boulder County is located approximately 53 miles north of Denver Colorado and is a Metropolitan Statistical Area.

State Demography Office Colorado Demographic Profile

Print Date: 03/15/2024

Community Profile for Chaffee County

Demographic information is critical for making informed decisions at the local, state and national level. This demographic profile is a summary of trends in a community. The dashboard provides charts, text, data and additional links to assist in the exploration and understanding of demographic trends for counties and municipalities in Colorado. The following collection of tables and charts establishes the context for assessing potential impacts and for decision-making.

Basic Statistics

The population base and trends of an area determine the needs for housing, schools, roads and other services. The age, income, race and ethnicity, and migration of the population of a community are all vital in planning for service

provision. The most significant demographic transitions for Colorado and its communities are related to disparate growth, aging, downward pressure on income, and growing racial and ethnic diversity.

Table 1: Community Quick Facts

Population Trends

The tables and plots in this section highlight trends and forecasts for the total population in Chaffee County. The table shows the overall population growth rate for Chaffee County and the State of Colorado. Additional plots show the overall population trends, forecasts for along with the overall components of change for Chaffee County.

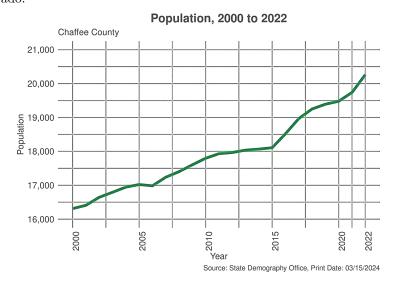

Table 2: Population Growth Rate

| Chaffee County | | Col | lorado | |
|----------------|------------|-------------|-----------------|-------------|
| Year | Population | Growth Rate | Population | Growth Rate |
| 1990 | 12,684 | | 3,294,473 | |
| 1995 | 14,656 | 2.9% | 3,811,074 | 3.0% |
| 2000 | 16,312 | 2.2% | 4,338,801 | 2.6% |
| 2005 | 17,022 | 0.9% | 4,662,534 | 1.4% |
| 2010 | 17,797 | 0.9% | $5,\!050,\!332$ | 1.6% |
| 2015 | 18,108 | 0.3% | 5,446,594 | 1.5% |
| 2020 | 19,478 | 1.5% | 5,784,584 | 1.2% |
| 2022 | 20,261 | 2.0% | 5,838,736 | 0.5% |

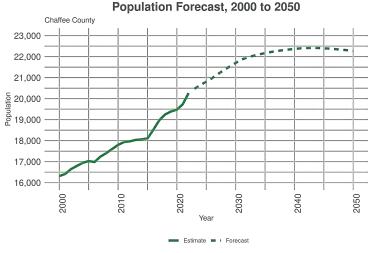

Note:

Source: State Demography Office, Print Date: 03/15/2024

At the end of 2022 the estimated population of Chaffee County was 20,261, an increase of 783 over the population in 2020. The growth rate for Chaffee County between 2020 and 2022 was 2.0 percent compared to 0.5 percent for the State of Colorado.

The population of Chaffee County is forecast to reach 19,478 by 2020 and 22,366 by 2040. Overall, the growth rate for Chaffee County is expected to decrease between 2020 and 2040. Between 2010 and 2020 the forecast growth rate was 0.9 percent, between 2020 and 2030 the forecast growth rate is 1.1 percent, while the forecast growth rate between 2030 and 2040 is 0.3 percent. The change is due in part to population aging and changes in the proportion of the population in childbearing ages. Note: Population forecasts are only provided for Colorado counties.

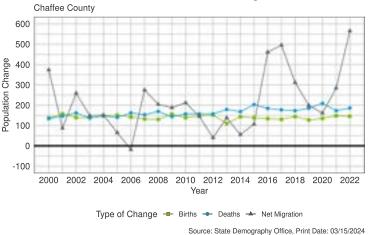

Source: State Demography Office, Print Date: 03/15/2024

Components of Population Change

Births, deaths and net migration are the main components of population change. Net migration is the difference between the number of people moving into an area and the number of people moving out. Change in net migration typically causes most of the changes in population trends because migration is more likely to experience short-term fluctuations than births and deaths. Migration also tends to be highly correlated to job growth or decline in communities where most of the residents work where they live. For many counties with negative natural increase (more deaths than births), this makes migration especially important for population stability and growth.

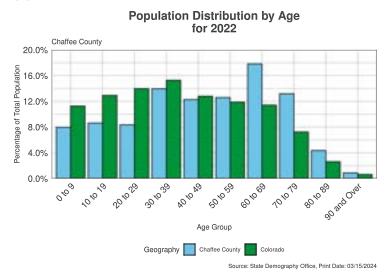

Page 43

Over the past five years, between 2018 and 2022, the population of Chaffee County has increased by 1,294 people. The total natural increase (births - deaths) over this period was -274 and the total net migration (new residents who moved in minus those who moved out) was 2,016. Note: Components of Change data are only available for Colorado counties.

Age Characteristics

Every community has a different age profile and is aging differently. People in different age groups work, live, shop, and use resources differently and these differences will impact the economy, labor force, housing, school districts, day care facilities, health services, disability services, transportation, household income, and public finance. An aging population may put downward pressure on local government tax revenue due to changes in spending on taxable goods.

The age distribution of the population of Chaffee County and Colorado are shown here.

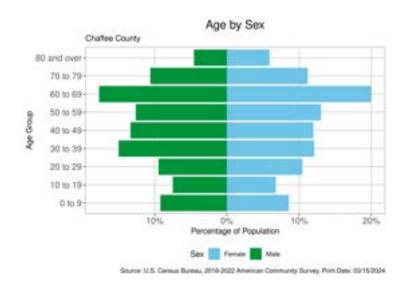

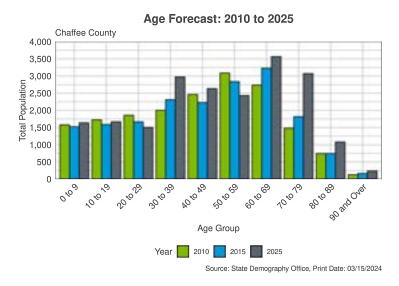

Table 3: Median Age by Sex Comparison

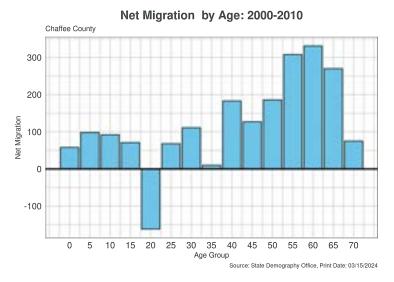

| | Chaffee County | | Colorado | | | |
|--------|----------------|-----|------------|-----|------------|-----------|
| Sex | Median Age | MOE | Median Age | MOE | Signficant | Direction |
| Total | 47.8 | 1.3 | 37.3 | 0.1 | Yes | Older |
| Male | 46.2 | 1.0 | 36.5 | 0.1 | Yes | Older |
| Female | 50.1 | 1.3 | 38.1 | 0.1 | Yes | Older |

 Source: U.S. Census Bureau, 2018-2022 American Community Survey, Print Date: $03/15/2024\,$

The median age of Chaffee County is 12 years older than the state. Women in Chaffee County are significantly older than women in the state and men in Chaffee County are significantly older than men in the state.

The changing age distribution of the population of Chaffee County for the period from 2010 through 2025 is shown here. The changes in proportion of different groups can highligh the need for future planning and service provision. Many areas have a larger share of older adults, indicating the need to evaluate housing, transportation and other needs of the senior population.

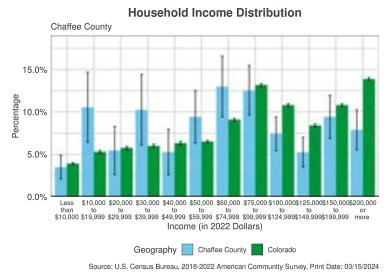

This plot shows the net migration by age in Chaffee County. Colorado typically draws many young adults as migrants. Areas with colleges and resorts draw a number of 18 to 24 year olds. Areas with a growing economy tend to account mostly 25 to 35 year olds and areas attractive to retirees tend to draw both workers and older adults.

Population Characteristics: Income, Education and Race

The plots and tables in this section describe the general population characteristics of Chaffee County. The bars on the plots show the width of the 90 percent confidence interval. Categories where the bars do not overlap are significantly different.

Household Income The household income distribution plot compares Chaffee County to the statewide household incomes. Household income comes primarily from earnings at work, but government transfer payments such as Social Security and TANF and unearned income from dividends, interest and rent are also included. Income and education levels are highly correlated; areas that have lower educational attainment than the state will typically have lower household incomes.

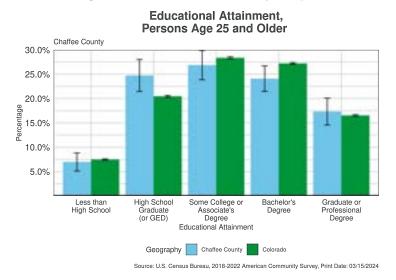

The Houselold Income Source(s) Table shows household income sources and amounts for housholds in Chaffee County. Households will have multiple sources of income, so this table is not mutually exclusive. Mean income values reflect values from the cited source.

Table 4: Household Income Source(s)

Housing and Households

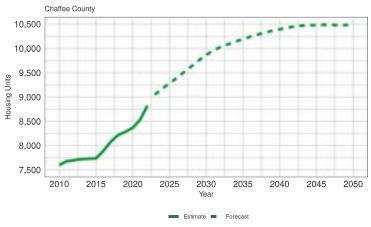

Understanding the current housing stock is critical for understanding how the community can best address current and future demands. This section begins with a projection of households. The projection of households is derived by county specific headship rates for the population by a ge. Beyond the numbers and characteristics, understanding the value and affordability of housing units is vital. Are the housing prices prohibitive to new families? Are the housing prices at such a high price that once the current work force ages and sells, those housing units will most likely go into the vacation seasonal market? Or are housing prices reasonable and suddenly the community is experiencing growth in families with children? How many total housing units are there? What types of new units are being built - multi-family vs single family?

³ 2022: Source: U.S. Census Bureau, 2018-2022 American Community Survey, Print Date: 03/15/2024

Total Household Projection: 2010-2050

Source: State Demography Office. Print Date: 03/15/2024

The Household Estimates plot shows the current and projected number of households in Chaffee County between 2010 and 2050.

The next several tables provide an overview of the housing stock in an area. The availability of land and the cost of land can dictate whether housing is less dense, with a greater number of single family units or more dense with a number of multifamily apartments and condos. Median home values and median gross rents are often considerably lower than current market prices as the values are computed from a 5-year average that runs through 2016. The number of people per household can offer insights as to the composition of the households . Areas with a larger number of people per household often have more families with children under 18 or a number of roommates living together to share housing costs. Those with a smaller number of persons per household, likely have a larger share of single-person households.

The Job Growth and Net Migration plot shows the relationship between job gowth and migration in Chaffee County. Generally, migration patterns follow changes in job growth demand.

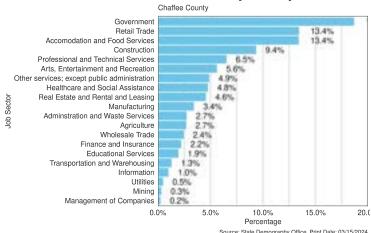

Employment by Industry

Identifying the industries which may be driving the growth and change within a community is a vital part of understanding community dynamics. Growth in jobs often results in growth in residents from migration within a community. Identifying the trends of growth or decline of jobs and the types of jobs available within the community is important.

The Estimated Firms and Jobs series created by the SDO gives a comprehensive look at the number of firms and jobs located within Chaffee County. It is broad in scope, capturing both wage and salary workers as well as most proprietors and agricultural workers. A more diverse economy is typically more resilient too; when looking at the employment trends recently and after a recession (shaded in gray) it is also important to look at the current share of employment by industry. Areas dependent on a single industry such as agriculture, mining or tourism can suffer from prolonged downturns due to drought, shifting demand for commodities, and the health of the national economy.

2022 Share of Jobs by Industry

The total estimated jobs are subdivided into 3 categories:

- Direct Basic: jobs that bring outside dollars into the community by selling goods or services outside the county, such as manufacturing or engineering services,
- Indirect Basic: jobs that are created as the result of goods and services purchased by direct basic such as accounting services or raw material inputs, and
- Local (Resident) Services: jobs that are supported when income earned from the base industries is spent locally at retailers or are supported by local tax dollars to provide services like education and public safety.

This plot shows the jobs by industry profile for Chaffee County. The relative rank of high-paying sectors, such as mining, information and finacial and insurance services versus mid-range jobs (e.g., contsruction, health casre and government) and lower-paying industrices such as retail trade and accommodation and food services, will have an impact on a counties' overall economic health.

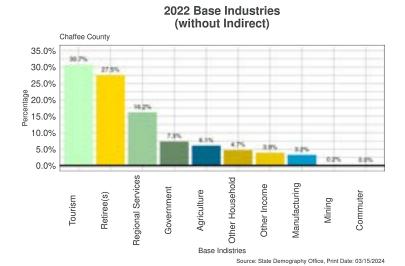

Table 10: Jobs by Sector: Chaffee County, 2022

| Employment Type | Number of Jobs | Percentage |
|---------------------------|----------------|------------|
| Direct Basic Employment | 8,901 | 73.7% |
| Indirect Basic Employment | 1,179 | 9.8% |
| Local Services Employment | 1,997 | 16.5% |
| Total Employment | 12,078 | 100.0% |
| Total Population, 16+ | 0 | |

Source: State Demography Office, Print Date: 03/15/2024

Similar to the industry employment, areas with large amounts of diversity in their base industries tend to suffer less during downturns and recover more quickly. Regional Services is a diverse base industry that encompasses all services and goods that a region sells to those in surrounding areas; examples include specialized health care, construction, air or rail transportation, and large item retail purchases like autos or appliances. Retirees are considered basic since they spend money from social security or other pensions, Medicare and savings. Government typically only includes employment in Federal Government and State Government. Tourism not only includes traditional tourist services like accommodation and food, but also includes 2nd homes, property management and transportation of tourists by airlines, car rental, car sharing and shuttles.

Employment Forecast and Wage Information

Understanding the types of jobs forecast to grow in a community, if jobs are forecast to increase, will aid in further understanding potential changes in

population, labor force, housing demand, and household income. Important questions to ask include; What is the current forecast for job growth based on the current industry mix? What types of jobs are forecast to grow? What are the wages for those jobs? What are the labor force trends for the community? Is the labor force expected to grow or slow down?

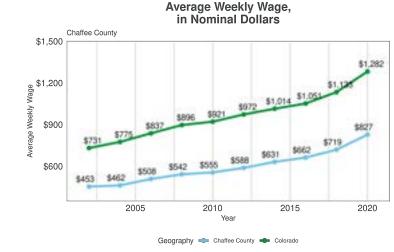

Table 11: Jobs and Population Forecast

Note:

Source: State Demography Office, Print Date: 03/15/2024

The total jobs forecast and population forecast are for Chaffee County shown here. The two lines diverge over time due to the aging of our population and continued growth in our under 18 population – two segments of the population that are less likely to be employed. Growth in the 65 plus population in the labor force through 2040 compared to the universe population of those over the age of 16 since labor force participation declines with age, especially among those eligible for pensions or social security.

Source: Department of Labor and Employment (QCEW), Print Date: 03/15/2024

The unajdusted (nominal) average weekly wages for Chaffee County and Colorado are shown here. The gain or loss of a major employer such as a mine or a hospital can have a significant impact on a county's average weekly wage. These wages are shown only for jobs located within that county and do not include most proprietors. Household income can be influenced by the average weekly wage, but in areas that have considerable amounts commuting or unearned income this relationship is not particularly strong.

This table compares the forecast residential labor force to the forecast population of person age 16 and older for Chaffee County.

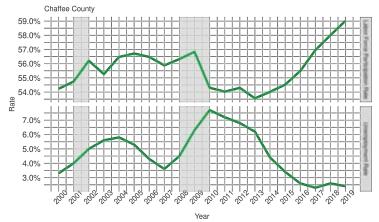

Table 12: Forecast Resident Labor Force and Population, Age 16 +

| | | | Chaffee County | | |

Labor Force Participation and Unemployment Rate 2000 to 2022

Source: State Demography Office and U.S. Bureau of Economic Analysis, Print Date: 03/15/2024 Note: Grey shading represents beginning to bottom of U.S. recessions

The labor force participation and employment plot compares the percentage of persons age 16 and older in the labor force to the unemployment rate. The pattern of labor force partipation and unemployment in Chaffee County are closely related. The downward trend in labor force partipation is related to the aging patterns in the county, along with the availability and character of employment. Additionally, as unemployment falls, the incentive for people to enter the labor force increases.

State Demography Office Colorado Demographic Profile

Print Date: 03/15/2024

Community Profile for Fremont County

Demographic information is critical for making informed decisions at the local, state and national level. This demographic profile is a summary of trends in a community. The dashboard provides charts, text, data and additional links to assist in the exploration and understanding of demographic trends for counties and municipalities in Colorado. The following collection of tables and charts establishes the context for assessing potential impacts and for decision-making.

Basic Statistics

The population base and trends of an area determine the needs for housing, schools, roads and other services. The age, income, race and ethnicity, and migration of the population of a community are all vital in planning for service

provision. The most significant demographic transitions for Colorado and its communities are related to disparate growth, aging, downward pressure on income, and growing racial and ethnic diversity.

Population Trends

The tables and plots in this section highlight trends and forecasts for the total population in Fremont County. The table shows the overall population growth rate for Fremont County and the State of Colorado. Additional plots show the overall population trends, forecasts for along with the overall components of change for Fremont County.

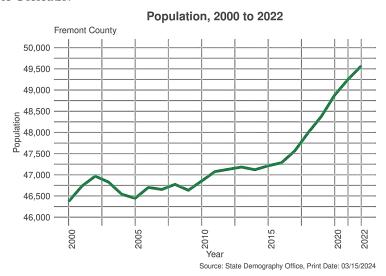

Table 2: Population Growth Rate

| | Fremont County | | | Colorado | | |
|------|----------------|-------------|-----------------|-------------|--|--|
| Year | Population | Growth Rate | Population | Growth Rate | | |
| 1990 | 32,273 | | 3,294,473 | | | |
| 1995 | 40,522 | 4.7% | 3,811,074 | 3.0% | | |
| 2000 | $46,\!370$ | 2.7% | 4,338,801 | 2.6% | | |
| 2005 | 46,447 | 0.0% | 4,662,534 | 1.4% | | |
| 2010 | 46,854 | 0.2% | $5,\!050,\!332$ | 1.6% | | |
| 2015 | 47,213 | 0.2% | 5,446,594 | 1.5% | | |
| 2020 | 48,881 | 0.7% | 5,784,584 | 1.2% | | |
| 2022 | $49,\!570$ | 0.7% | 5,838,736 | 0.5% | | |

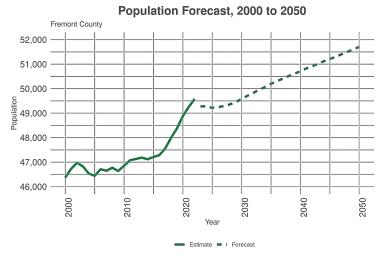

Note:

Source: State Demography Office, Print Date: 03/15/2024

At the end of 2022 the estimated population of Fremont County was 49,570, an increase of 689 over the population in 2020. The growth rate for Fremont County between 2020 and 2022 was 0.7 percent compared to 0.5 percent for the State of Colorado.

The population of Fremont County is forecast to reach 48,881 by 2020 and 50,711 by 2040. Overall, the growth rate for Fremont County is expected to decrease between 2020 and 2040. Between 2010 and 2020 the forecast growth rate was 0.4 percent, between 2020 and 2030 the forecast growth rate is 0.1 percent, while the forecast growth rate between 2030 and 2040 is 0.2 percent. The change is due in part to population aging and changes in the proportion of the population in childbearing ages. Note: Population forecasts are only provided for Colorado counties.

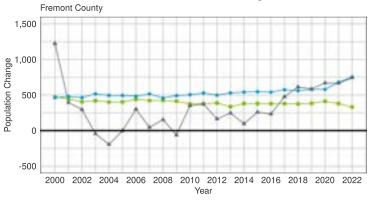

Source: State Demography Office, Print Date: 03/15/2024

Components of Population Change

Births, deaths and net migration are the main components of population change. Net migration is the difference between the number of people moving into an area and the number of people moving out. Change in net migration typically causes most of the changes in population trends because migration is more likely to experience short-term fluctuations than births and deaths. Migration also tends to be highly correlated to job growth or decline in communities where most of the residents work where they live. For many counties with negative natural increase (more deaths than births), this makes migration especially important for population stability and growth.

Type of Change → Births → Deaths → Net Migration

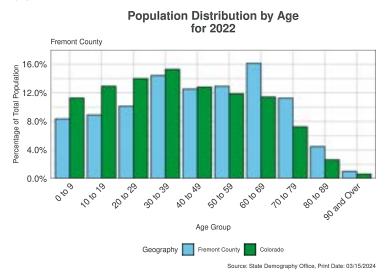

Source: State Demography Office, Print Date: 03/15/2024

Over the past five years, between 2018 and 2022, the population of Fremont County has increased by 2,006 people. The total natural increase (births - deaths) over this period was -1,468 and the total net migration (new residents who moved in minus those who moved out) was 3,754. Note: Components of Change data are only available for Colorado counties.

Age Characteristics

Every community has a different age profile and is aging differently. People in different age groups work, live, shop, and use resources differently and these differences will impact the economy, labor force, housing, school districts, day care facilities, health services, disability services, transportation, household income, and public finance. An aging population may put downward pressure on local government tax revenue due to changes in spending on taxable goods.

The age distribution of the population of Fremont County and Colorado are shown here.

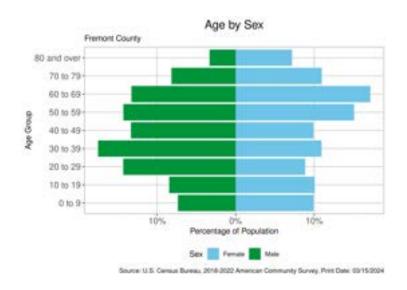

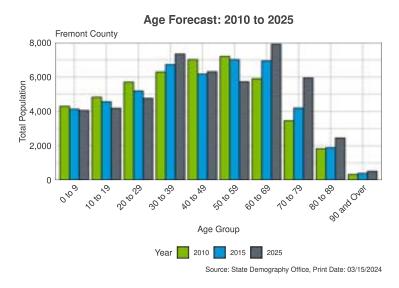

Table 3: Median Age by Sex Comparison

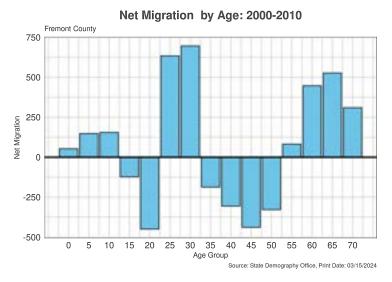

| | Fremont C | ounty | Colorado | | | |
|--------|------------|-------|------------|-----|------------|-----------|
| Sex | Median Age | MOE | Median Age | MOE | Signficant | Direction |
| Total | 44.9 | 0.5 | 37.3 | 0.1 | Yes | Older |
| Male | 41.8 | 0.9 | 36.5 | 0.1 | Yes | Older |
| Female | 50.3 | 0.5 | 38.1 | 0.1 | Yes | Older |

 Source: U.S. Census Bureau, 2018-2022 American Community Survey, Print Date: $03/15/2024\,$

The median age of Fremont County is 12.2 years older than the state. Women in Fremont County are significantly older than women in the state and men in Fremont County are significantly older than men in the state.

The changing age distribution of the population of Fremont County for the period from 2010 through 2025 is shown here. The changes in proporion of different groups can highligh the need for future planning and service provision. Many areas have a larger share of older adults, indicating the need to evaluate housing, transportation and other needs of the senior population.

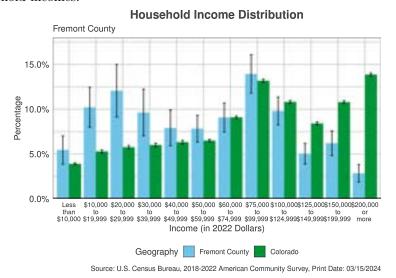

This plot shows the net migration by age in Fremont County. Colorado typically draws many young adults as migrants. Areas with colleges and resorts draw a number of 18 to 24 year olds. Areas with a growing economy tend to account mostly 25 to 35 year olds and areas attractive to retirees tend to draw both workers and older adults.

Population Characteristics: Income, Education and Race

The plots and tables in this section describe the general population characteristics of Fremont County. The bars on the plots show the width of the 90 percent confidence interval. Categories where the bars do not overlap are significantly different.

Household Income The household income distribution plot compares Fremont County to the statewide household incomes. Household income comes primarily from earnings at work, but government transfer payments such as Social Security and TANF and unearned income from dividends, interest and rent are also included. Income and education levels are highly correlated; areas that have lower educational attainment than the state will typically have lower household incomes.

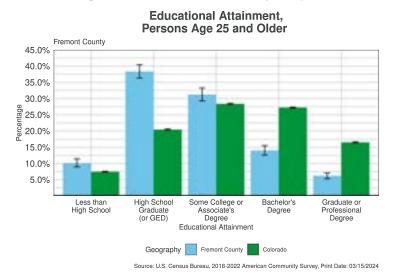

The Houselold Income Source(s) Table shows household income sources and amounts for housholds in Fremont County. Households will have multiple sources of income, so this table is not mutually exclusive. Mean income values reflect values from the cited source.

Table 4: Household Income Source(s)

Housing and Households

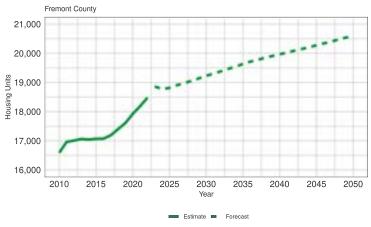

Understanding the current housing stock is critical for understanding how the community can best address current and future demands. This section begins with a projection of households. The projection of households is derived by county specific headship rates for the population by a ge. Beyond the numbers and characteristics, understanding the value and affordability of housing units is vital. Are the housing prices prohibitive to new families? Are the housing prices at such a high price that once the current work force ages and sells, those housing units will most likely go into the vacation seasonal market? Or are housing prices reasonable and suddenly the community is experiencing growth in families with children? How many total housing units are there? What types of new units are being built - multi-family vs single family?

Total Household Projection: 2010-2050

Source: State Demography Office, Print Date: 03/15/2024

The Household Estimates plot shows the current and projected number of households in Fremont County between 2010 and 2050.

The next several tables provide an overview of the housing stock in an area. The availability of land and the cost of land can dictate whether housing is less dense, with a greater number of single family units or more dense with a number of multifamily apartments and condos. Median home values and median gross rents are often considerably lower than current market prices as the values are computed from a 5-year average that runs through 2016. The number of people per household can offer insights as to the composition of the households . Areas with a larger number of people per household often have more families with children under 18 or a number of roommates living together to share housing costs. Those with a smaller number of persons per household, likely have a larger share of single-person households.

Commuting

Commuting plays an important role in the economy of an area because not all workers live where they work. Commuting impacts local job growth, access to employees, and transportation infrastructure. The Commuting diagram identifies three groups of people:

- People who work in Fremont County, but live elsewhere.
- People who live in Fremont County, but work elsewhere.
- People who live and work in Fremont County.

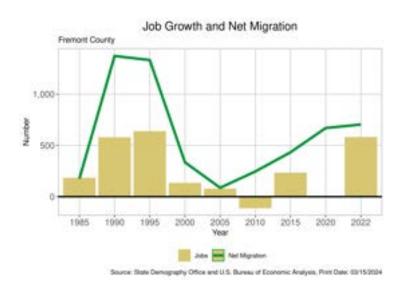

- Employed in Selected Area, Live Outside: 3,788
- Live in Selected Area, Employed Outside: 10,509
- Employed and Live in Selected Area: 7,028

The Job Growth and Net Migration plot shows the relationship between job gowth and migration in Fremont County. Generally, migration patterns follow changes in job growth demand.

Employment by Industry

Identifying the industries which may be driving the growth and change within a community is a vital part of understanding community dynamics. Growth in jobs often results in growth in residents from migration within a community. Identifying the trends of growth or decline of jobs and the types of jobs available within the community is important.

The Estimated Firms and Jobs series created by the SDO gives a comprehensive look at the number of firms and jobs located within Fremont County. It is broad in scope, capturing both wage and salary workers as well as most proprietors and agricultural workers. A more diverse economy is typically more resilient too; when looking at the employment trends recently and after a recession (shaded in gray) it is also important to look at the current share of employment by industry. Areas dependent on a single industry such as agriculture, mining or tourism can suffer from prolonged downturns due to drought, shifting demand for commodities, and the health of the national economy.

The total estimated jobs are subdivided into 3 categories:

- Direct Basic: jobs that bring outside dollars into the community by selling goods or services outside the county, such as manufacturing or engineering services,
- Indirect Basic: jobs that are created as the result of goods and services purchased by direct basic such as accounting services or raw material inputs, and
- Local (Resident) Services: jobs that are supported when income earned from the base industries is spent locally at retailers or are supported by local tax dollars to provide services like education and public safety.

This plot shows the jobs by industry profile for Fremont County. The relative rank of high-paying sectors, such as mining, information and finacial and insurance services versus mid-range jobs (e.g., contsruction, health casre and government) and lower-paying industrices such as retail trade and accommodation and food services, will have an impact on a counties' overall economic health.

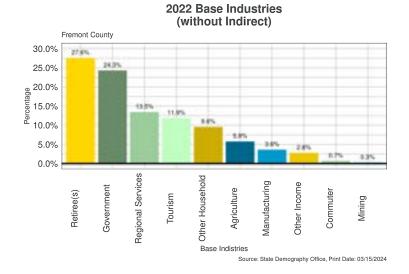

Table 10: Jobs by Sector: Fremont County, 2022

| Employment Type | Number of Jobs | Percentage |
|---------------------------|----------------|------------|
| Direct Basic Employment | 13,944 | 76.3% |
| Indirect Basic Employment | 1,979 | 10.8% |
| Local Services Employment | $2,\!355$ | 12.9% |
| Total Employment | 18,278 | 100.0% |
| Total Population, 16+ | 0 | |

Source: State Demography Office, Print Date: 03/15/2024

Similar to the industry employment, areas with large amounts of diversity in their base industries tend to suffer less during downturns and recover more quickly. Regional Services is a diverse base industry that encompasses all services and goods that a region sells to those in surrounding areas; examples include specialized health care, construction, air or rail transportation, and large item retail purchases like autos or appliances. Retirees are considered basic since they spend money from social security or other pensions, Medicare and savings. Government typically only includes employment in Federal Government and State Government. Tourism not only includes traditional tourist services like accommodation and food, but also includes 2nd homes, property management and transportation of tourists by airlines, car rental, car sharing and shuttles.

Employment Forecast and Wage Information

Understanding the types of jobs forecast to grow in a community, if jobs are forecast to increase, will aid in further understanding potential changes in

population, labor force, housing demand, and household income. Important questions to ask include; What is the current forecast for job growth based on the current industry mix? What types of jobs are forecast to grow? What are the wages for those jobs? What are the labor force trends for the community? Is the labor force expected to grow or slow down?

Table 11: Jobs and Population Forecast

The total jobs forecast and population forecast are for Fremont County shown here. The two lines diverge over time due to the aging of our population and continued growth in our under 18 population – two segments of the population that are less likely to be employed. Growth in the 65 plus population in the labor force through 2040 compared to the universe population of those over the age of 16 since labor force participation declines with age, especially among those eligible for pensions or social security.

Source: Department of Labor and Employment (QCEW), Print Date: 03/15/2024

The unajdusted (nominal) average weekly wages for Fremont County and Colorado are shown here. The gain or loss of a major employer such as a mine or a hospital can have a significant impact on a county's average weekly wage. These wages are shown only for jobs located within that county and do not include most proprietors. Household income can be influenced by the average weekly wage, but in areas that have considerable amounts commuting or unearned income this relationship is not particularly strong.

This table compares the forecast residential labor force to the forecast population of person age 16 and older for Fremont County.

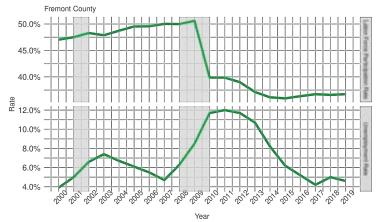

Table 12: Forecast Resident Labor Force and Population, Age 16 +

| | Fremont County | | | | | | |

Labor Force Participation and Unemployment Rate 2000 to 2022

Source: State Demography Office and U.S. Bureau of Economic Analysis, Print Date: 03/15/2024 Note: Grey shading represents beginning to bottom of U.S. recessions

The labor force participation and employment plot compares the percentage of persons age 16 and older in the labor force to the unemployment rate. The pattern of labor force partipation and unemployment in Fremont County are closely related. The downward trend in labor force partipation is related to the aging patterns in the county, along with the availability and character of employment. Additionally, as unemployment falls, the incentive for people to enter the labor force increases.

State Demography Office Colorado Demographic Profile

Print Date: 03/15/2024

Community Profile for Boulder County

Demographic information is critical for making informed decisions at the local, state and national level. This demographic profile is a summary of trends in a community. The dashboard provides charts, text, data and additional links to assist in the exploration and understanding of demographic trends for counties and municipalities in Colorado. The following collection of tables and charts establishes the context for assessing potential impacts and for decision-making.

Basic Statistics

The population base and trends of an area determine the needs for housing, schools, roads and other services. The age, income, race and ethnicity, and migration of the population of a community are all vital in planning for service

provision. The most significant demographic transitions for Colorado and its communities are related to disparate growth, aging, downward pressure on income, and growing racial and ethnic diversity.

Population Trends

The tables and plots in this section highlight trends and forecasts for the total population in Boulder County. The table shows the overall population growth rate for Boulder County and the State of Colorado. Additional plots show the overall population trends, forecasts for along with the overall components of change for Boulder County.

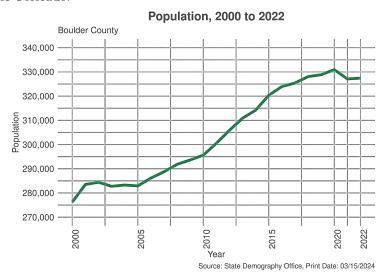

Table 2: Population Growth Rate

| | Boulder County | | | lorado |
|------|----------------|-------------|-----------------|-------------|
| Year | Population | Growth Rate | Population | Growth Rate |
| 1990 | 225,339 | | 3,294,473 | |
| 1995 | 257,500 | 2.7% | 3,811,074 | 3.0% |
| 2000 | 276,255 | 1.4% | 4,338,801 | 2.6% |
| 2005 | 282,910 | 0.5% | 4,662,534 | 1.4% |
| 2010 | $295,\!605$ | 0.9% | $5,\!050,\!332$ | 1.6% |
| 2015 | 320,352 | 1.6% | 5,446,594 | 1.5% |
| 2020 | 330,923 | 0.7% | 5,784,584 | 1.2% |
| 2022 | $327,\!424$ | -0.5% | 5,838,736 | 0.5% |

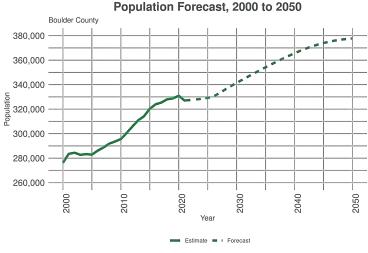

Note:

Source: State Demography Office, Print Date: 03/15/2024

At the end of 2022 the estimated population of Boulder County was 327,424, a decrease of -3,499 over the population in 2020. The growth rate for Boulder County between 2020 and 2022 was -0.5 percent compared to 0.5 percent for the State of Colorado.

The population of Boulder County is forecast to reach 330,923 by 2020 and 365,619 by 2040. Overall, the growth rate for Boulder County is expected to decrease between 2020 and 2040. Between 2010 and 2020 the forecast growth rate was 1.1 percent, between 2020 and 2030 the forecast growth rate is 0.3 percent, while the forecast growth rate between 2030 and 2040 is 0.7 percent. The change is due in part to population aging and changes in the proportion of the population in childbearing ages. Note: Population forecasts are only provided for Colorado counties.

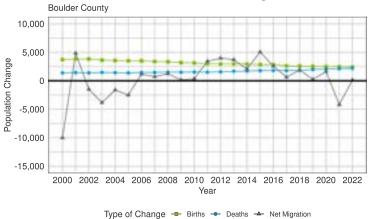

Source: State Demography Office, Print Date: 03/15/2024

Components of Population Change

Births, deaths and net migration are the main components of population change. Net migration is the difference between the number of people moving into an area and the number of people moving out. Change in net migration typically causes most of the changes in population trends because migration is more likely to experience short-term fluctuations than births and deaths. Migration also tends to be highly correlated to job growth or decline in communities where most of the residents work where they live. For many counties with negative natural increase (more deaths than births), this makes migration especially important for population stability and growth.

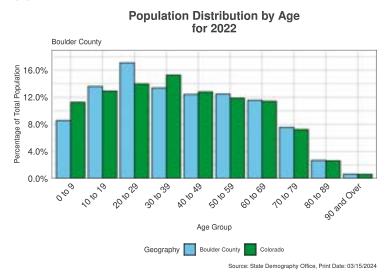

Source: State Demography Office, Print Date: 03/15/2024

Over the past five years, between 2018 and 2022, the population of Boulder County has increased by 2,010 people. The total natural increase (births - deaths) over this period was 3,143 and the total net migration (new residents who moved in minus those who moved out) was 324. Note: Components of Change data are only available for Colorado counties.

Age Characteristics

Every community has a different age profile and is aging differently. People in different age groups work, live, shop, and use resources differently and these differences will impact the economy, labor force, housing, school districts, day care facilities, health services, disability services, transportation, household income, and public finance. An aging population may put downward pressure on local government tax revenue due to changes in spending on taxable goods.

The age distribution of the population of Boulder County and Colorado are shown here.

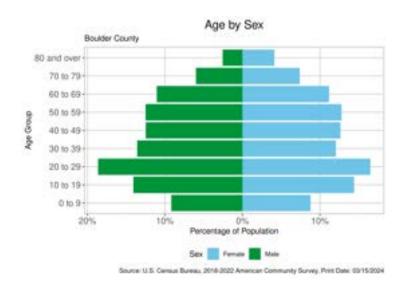

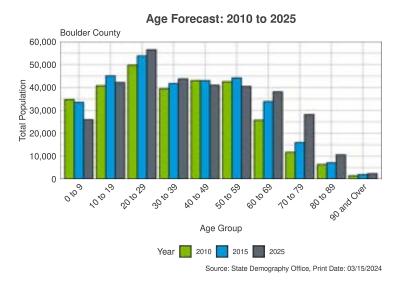

Table 3: Median Age by Sex Comparison

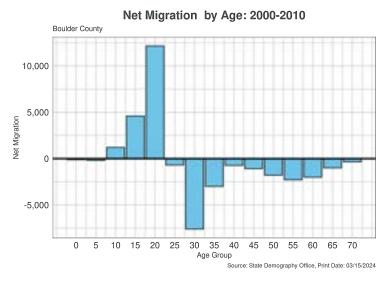

| | Boulder C | ounty | Colorado | | | |
|--------|------------|-------|------------|-----|------------|-----------|
| Sex | Median Age | MOE | Median Age | MOE | Signficant | Direction |
| Total | 37.0 | 0.2 | 37.3 | 0.1 | Yes | Younger |
| Male | 35.9 | 0.2 | 36.5 | 0.1 | Yes | Younger |
| Female | 38.4 | 0.3 | 38.1 | 0.1 | No | |

 Source: U.S. Census Bureau, 2018-2022 American Community Survey, Print Date: $03/15/2024\,$

The median age of Boulder County is 0.3 years younger than the state. Women are not significantly older or younger than women in the state but men in Boulder County are significantly younger than men in the state.

The changing age distribution of the population of Boulder County for the period from 2010 through 2025 is shown here. The changes in proportion of different groups can highligh the need for future planning and service provision. Many areas have a larger share of older adults, indicating the need to evaluate housing, transportation and other needs of the senior population.

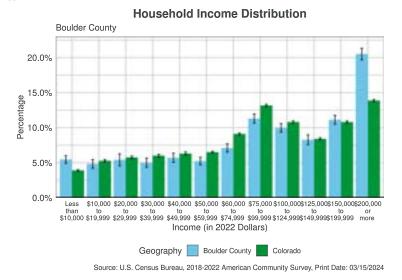

This plot shows the net migration by age in Boulder County. Colorado typically draws many young adults as migrants. Areas with colleges and resorts draw a number of 18 to 24 year olds. Areas with a growing economy tend to account mostly 25 to 35 year olds and areas attractive to retirees tend to draw both workers and older adults.

Population Characteristics: Income, Education and Race

The plots and tables in this section describe the general population characteristics of Boulder County. The bars on the plots show the width of the 90 percent confidence interval. Categories where the bars do not overlap are significantly different.

Household Income The household income distribution plot compares Boulder County to the statewide household incomes. Household income comes primarily from earnings at work, but government transfer payments such as Social Security and TANF and unearned income from dividends, interest and rent are also included. Income and education levels are highly correlated; areas that have lower educational attainment than the state will typically have lower household incomes.

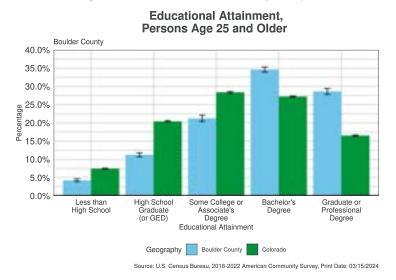

The Houselold Income Source(s) Table shows household income sources and amounts for housholds in Boulder County. Households will have multiple sources of income, so this table is not mutually exclusive. Mean income values reflect values from the cited source.

Table 4: Household Income Source(s)

| Boulder County | | | | | | |

Housing and Households

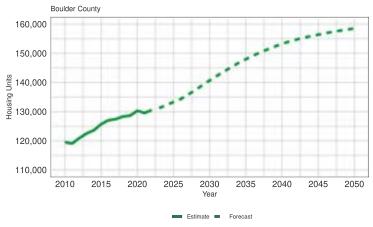

Understanding the current housing stock is critical for understanding how the community can best address current and future demands. This section begins with a projection of households. The projection of households is derived by county specific headship rates for the population by a ge. Beyond the numbers and characteristics, understanding the value and affordability of housing units is vital. Are the housing prices prohibitive to new families? Are the housing prices at such a high price that once the current work force ages and sells, those housing units will most likely go into the vacation seasonal market? Or are housing prices reasonable and suddenly the community is experiencing growth in families with children? How many total housing units are there? What types of new units are being built - multi-family vs single family?

Total Household Projection: 2010-2050

Source: State Demography Office. Print Date: 03/15/2024

The Household Estimates plot shows the current and projected number of households in Boulder County between 2010 and 2050.

The next several tables provide an overview of the housing stock in an area. The availability of land and the cost of land can dictate whether housing is less dense, with a greater number of single family units or more dense with a number of multifamily apartments and condos. Median home values and median gross rents are often considerably lower than current market prices as the values are computed from a 5-year average that runs through 2016. The number of people per household can offer insights as to the composition of the households . Areas with a larger number of people per household often have more families with children under 18 or a number of roommates living together to share housing costs. Those with a smaller number of persons per household, likely have a larger share of single-person households.

Commuting

Commuting plays an important role in the economy of an area because not all workers live where they work. Commuting impacts local job growth, access to employees, and transportation infrastructure. The Commuting diagram identifies three groups of people:

- People who work in Boulder County, but live elsewhere.
- People who live in Boulder County, but work elsewhere.
- People who live and work in Boulder County.

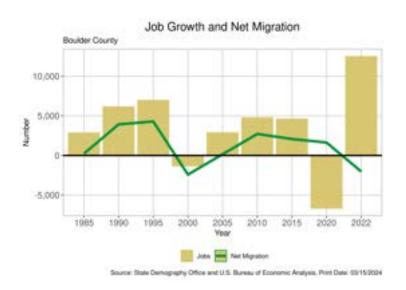

- Live in Selected Area, Employed Outside: 61,462
- Employed and Live in Selected Area: 84,556

The Job Growth and Net Migration plot shows the relationship between job gowth and migration in Boulder County. Generally, migration patterns follow changes in job growth demand.

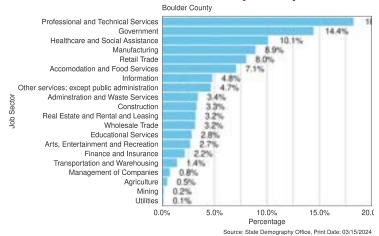

Employment by Industry

Identifying the industries which may be driving the growth and change within a community is a vital part of understanding community dynamics. Growth in jobs often results in growth in residents from migration within a community. Identifying the trends of growth or decline of jobs and the types of jobs available within the community is important.

The Estimated Firms and Jobs series created by the SDO gives a comprehensive look at the number of firms and jobs located within Boulder County. It is broad in scope, capturing both wage and salary workers as well as most proprietors and agricultural workers. A more diverse economy is typically more resilient too; when looking at the employment trends recently and after a recession (shaded in gray) it is also important to look at the current share of employment by industry. Areas dependent on a single industry such as agriculture, mining or tourism can suffer from prolonged downturns due to drought, shifting demand for commodities, and the health of the national economy.

2022 Share of Jobs by Industry

The total estimated jobs are subdivided into 3 categories:

- Direct Basic: jobs that bring outside dollars into the community by selling goods or services outside the county, such as manufacturing or engineering services,
- Indirect Basic: jobs that are created as the result of goods and services purchased by direct basic such as accounting services or raw material inputs, and
- Local (Resident) Services: jobs that are supported when income earned from the base industries is spent locally at retailers or are supported by local tax dollars to provide services like education and public safety.

This plot shows the jobs by industry profile for Boulder County. The relative rank of high-paying sectors, such as mining, information and finacial and insurance services versus mid-range jobs (e.g., contsruction, health casre and government) and lower-paying industrices such as retail trade and accommodation and food services, will have an impact on a counties' overall economic health.

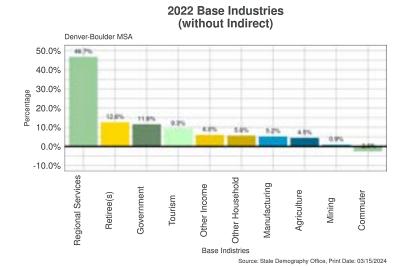

Table 10: Jobs by Sector: Denver-Boulder MSA, 2022

| Number of Jobs | Percentage |
|----------------|--|
| 1,122,018 | 51.2% |
| 237,609 | 10.9% |
| 829,868 | 37.9% |
| 2,189,495 | 100.0% |
| 0 | |
| | 1,122,018 237,609 829,868 2,189,495 |

Source: State Demography Office, Print Date: 03/15/2024

Similar to the industry employment, areas with large amounts of diversity in their base industries tend to suffer less during downturns and recover more quickly. Regional Services is a diverse base industry that encompasses all services and goods that a region sells to those in surrounding areas; examples include specialized health care, construction, air or rail transportation, and large item retail purchases like autos or appliances. Retirees are considered basic since they spend money from social security or other pensions, Medicare and savings. Government typically only includes employment in Federal Government and State Government. Tourism not only includes traditional tourist services like accommodation and food, but also includes 2nd homes, property management and transportation of tourists by airlines, car rental, car sharing and shuttles.

Employment Forecast and Wage Information

Understanding the types of jobs forecast to grow in a community, if jobs are forecast to increase, will aid in further understanding potential changes in

population, labor force, housing demand, and household income. Important questions to ask include; What is the current forecast for job growth based on the current industry mix? What types of jobs are forecast to grow? What are the wages for those jobs? What are the labor force trends for the community? Is the labor force expected to grow or slow down?

Table 11: Jobs and Population Forecast

The total jobs forecast and population forecast are for Denver-Boulder MSA shown here. The two lines diverge over time due to the aging of our population and continued growth in our under 18 population – two segments of the population that are less likely to be employed. Growth in the 65 plus population in the labor force through 2040 compared to the universe population of those over the age of 16 since labor force participation declines with age, especially among those eligible for pensions or social security. Note: Statistics for the counties in the Denver Metropolitan Statistical Area (Adams, Arapahoe, Boulder, Broomfield, Denver, Douglas and Jefferson) are combined in this section.

The unajdusted (nominal) average weekly wages for Boulder County and Colorado are shown here. The gain or loss of a major employer such as a mine or a hospital can have a significant impact on a county's average weekly wage. These wages are shown only for jobs located within that county and do not include most proprietors. Household income can be influenced by the average weekly wage, but in areas that have considerable amounts commuting or unearned income this relationship is not particularly strong.

This table compares the forecast residential labor force to the forecast population of person age 16 and older for Boulder County.

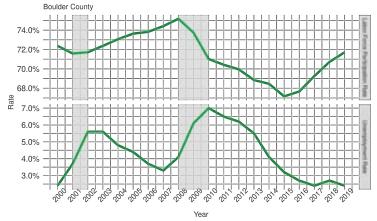

Table 12: Forecast Resident Labor Force and Population, Age 16 +

| | | | Boulder County | | |
|----------------------|----------------------------------|-------------------------------|---------------------------------------|-------------------------------|---|
| Year | Туре | Labor Force | Annual Growth Rate: Labor Force | Persons Age 16+ | Annual Growth Rate: Persons Age 16+ |
| 2010 2015 2025 | Estimate Estimate Forecast | 171,711 178,630 198,566 | 0.4% 0.6% | 238,922 260,814 297,616 | 2.1% 1.4% |

Labor Force Participation and Unemployment Rate 2000 to 2022

Source: State Demography Office and U.S. Bureau of Economic Analysis, Print Date: 03/15/2024 Note: Grey shading represents beginning to bottom of U.S. recessions

The labor force participation and employment plot compares the percentage of persons age 16 and older in the labor force to the unemployment rate. The pattern of labor force partipation and unemployment in Boulder County are closely related. The downward trend in labor force partipation is related to the aging patterns in the county, along with the availability and character of employment. Additionally, as unemployment falls, the incentive for people to enter the labor force increases.

HIGH COUNTRY BANK BRANCHES

List of the institutions' branches, their street addresses, geographies, and hours of operation.

The Bank is headquartered in Salida, Colorado, and is owned by High Country Bancorp, Inc., which is a single, noncomplex bank holding company also located in Salida. The Bank was originally established in 1886 as a building and loan association and became a state member bank effective April 1, 2009. The Federal Reserve of Kansas City is the Bank's primary regulator. In addition to the main location, the Bank operates branches in Salida, Buena Vista, Canon City and Longmont. The Bank owns and operates five automated teller machines (ATMs), one at each location. Drive up facilities are located at all of our current bank locations except Longmont. In addition to the physical locations, the Bank offers telephone, internet and mobile banking services.

HOME MORTGAGE DISCLOSURE ACT (HMDA) NOTICE

The HMDA data about our residential mortgage lending are available online for review. The data show geographic distribution of loans and applications; ethnicity, race, sex, age, and income of applicants and borrowers; and information about loan approvals and denials. HMDA data for many other financial institutions are also available online. For more information visit the Consumer Financial Protection Bureau's Web site (ffiec.cfpb.gov/data-publication/disclosure-reports).
